

Providing Scalable Surveillance Solutions for Vessels, Ports, Waterways, and Offshore Facilities.

Blue Force Tracker (BFT)

SSR Engineering's Blue Force Tracker unit allows secure exchange of information between cooperating vessels and the command center utilizing standard AIS equipment.

The Command Center receives and decrypts the information

The secure information is displayed on Operator Consoles.

Ships transmit encrypted position information

Features:

- Interfaces with any commercial AIS base station
- Controls any AIS mobile unit supporting BFT modes
- Simple selection of BFT Normal, Restricted, or Quiet Mode
- BFT tracks can be displayed on RDOP or other Consoles
- AES Encryption
